

KSENIIA GASENKO

Change Implementation | Business Systems | Process Improvement | Digital Operations

Bethesda, MD | kgasenko@gmail.com | +1 443 972 1140 | LinkedIn

Operations and business systems professional with 7+ years of experience improving workflows, data visibility, customer journeys, and digital operations. I investigate process gaps, design practical systems, support adoption, and turn manual work into clearer processes, reports, and measurable results.

CORE SKILLS

Change & Process: process investigation, change implementation, SOPs, stakeholder updates, training, adoption support	Business Systems: ATS/CRM, workforce systems, school management software, WordPress, Google Workspace, integrations
Analysis & Reporting: KPI reports, market analysis, feasibility reports, channel performance, ROI, budget models	Digital Growth: landing pages, job boards, social media, referral workflows, email campaigns, lead generation

PROFESSIONAL EXPERIENCE

Business Operations & Systems Consultant

Olenka School of Music | Remote / Maryland | Jul 2026 - Present

- Started with process analysis and identified that the immediate priority was revenue and lead generation before full software implementation.
- Restructured program pages, schedules, pricing language, trial paths, checkout logic, and enrollment calls to action around how parents choose classes.
- Increased first-month registrations and revenue by about 4x compared with the same period the previous year, with the same programs and enrollment timing.
- Analyzed school-management needs, researched platforms, and shortlisted 5 systems for hands-on testing against real workflows: trials, family accounts, sibling discounts, schedules, payments, attendance, and communication.
- Created and improved landing pages, email campaigns, schedule blocks, program messaging, and marketing assets to support enrollment and reduce confusion.

Operations Manager

TBest Services Inc. | Columbia, MD / Hybrid | Nov 2023 - Present

- Manage operations, business systems, reporting, service workflows, digital presence, and process improvement across staffing and recruiting services.
- Identified that the main constraint was candidate acquisition: BambooHR and limited marketing produced about 300 resumes/month only with ongoing promotion and heavy manual work.
- Evaluated ATS/workforce systems using 90+ criteria, tested recruiter workflows, and implemented a lower-cost platform with ATS, CRM, workforce, onboarding, tasks, integrations, and AI-assisted search.
- Increased resume flow by about 1.5x without active promotion and 2-3x with limited promotion by adding free job-board integrations, social media campaigns, referral workflows, and website applications.
- Reduced sourcing time from hours to minutes through advanced search, structured filters, Boolean search, data cleanup, and AI-assisted matching workflows.
- Built reports and data analysis for strategic planning, including applicant sources, referrals, bottlenecks, channel performance, hiring costs, ROI, pay competitiveness, and role feasibility.
- Built and normalized 20K+ lead records and grew the ATS candidate database to about 20K through sourcing workflows, imports, referrals, website improvements, and data cleanup.
- Set up users, permissions, pipelines, onboarding workflows, approval steps, business units, integrations, troubleshooting guides, training sessions, and ongoing adoption support.

- Developed service models, pricing logic, markup analysis, modular MSA structures, client materials, market analysis, and early job-board / resume-traffic concepts.

Recruiting Assistant / Advertising Specialist

TBest Services Inc. | Columbia, MD / Remote | Dec 2022 - Oct 2023

- Supported recruiting operations, job advertising, candidate pipeline coordination, and applicant tracking for staffing and direct-hire roles.
- Created and optimized job ads across Indeed, LinkedIn, ZipRecruiter, the company website, and other job boards based on role urgency, pay, client requirements, and applicant quality.
- Maintained ATS data accuracy, candidate profiles, pipeline stages, notes, duplicate review, recruiter handoffs, and client submission preparation.

Independent Digital Transformation & Automation Consultant, Online CME Systems

Self-Employed | Kyiv, Ukraine / Remote | Feb 2020 - Jun 2023

- Built a low-cost online CME system for healthcare education events covering landing pages, registration, payments, access, live broadcasts, testing, certificates, records, reporting, and email communication.
- Converted manual and location-limited event operations into a scalable online model that supported 1K-4K participants at a time instead of typical 100-500 attendee in-person events.
- Built no-code and low-code automations with Zapier, Integreatly, Google Sheets, and Google Apps Script to connect registration, communication, access tracking, certificate generation, and email distribution.
- Expanded the healthcare professionals database from about 4K to 45K+ contacts and maintained attendance, testing, payment, certificate, and communication records for reporting and auditability.
- Created landing pages, email campaigns, audience segmentation, and re-engagement campaigns to drive participation and retention.

CME Event Project Manager

New Vivo LLC | Kyiv, Ukraine / Hybrid | Feb 2018 - Feb 2020

- Managed CME, healthcare, corporate, and business events from planning to closeout, including budgets, vendors, logistics, speakers, registration, attendee communication, and post-event follow-up.
- Introduced online registration tools and attendee communication workflows to reduce paper registration, manual data entry, and database errors.
- Reviewed attendance, feedback, operational issues, and marketing results to improve preparation, promotion, and participant experience.

SELECTED EARLIER CHANGE PROJECT

- Hotel complex: redesigned banquet/event-service ownership around customer behavior, decision fatigue, and evening/weekend availability. Combined roles into one client-facing model with a 3-days-on / 3-days-off rotation, increasing internal service adoption to about 90% of banquet clients and monthly vendor-fee revenue by roughly 4-6x.

EDUCATION & CERTIFICATIONS

- Associate Degree Equivalence, Commercial Management - Polytechnic College, Ukraine
- Google Data Analytics Professional Certificate; Google Digital Marketing & E-Commerce Certificate; Project Management Foundations
